

Gonçalo Vilaça is a healthcare & life sciences venture builder and executive.

He currently serves as the Executive Director of NOVA Health at NOVA University Lisbon, where he is building a leading European medical school, shaping the future of health education and creating a new health tech innovation ecosystem. He is also part of Portugal Ventures' digital & health tech expert group and an advisor to impact startups.

Prior to that, he was COO at Tonic App, a VC backed Portuguese digital health startup that successfully raised more than 4M and scaled across Europe; Co-Founder at Alcea Advisors, a pan-European Paris based VC firm to grow and accelerate the most innovative European startups in oncology; an Engagement Manager with the Oliver Wyman Group based in Paris and London leading M&A, finance and healthcare analytics engagements for public and private clients in Europe, North America and Asia. He was also a Founding Member of Health Parliament Portugal where he campaigned the use of social impact bonds in mental health and was part of a team that successfully pushed for policy changes to improve the lives of people with mental illness.

Gonçalo has taught at HEC Paris, Toulouse School of Economics and NOVA IMS. He holds a MPhil in Econometrics and Mathematical Economics from Toulouse School of Economics, a MSc in Economics from NOVA SBE and a Certificate in Biotechnology and Systems Biology from Icahn School of Medicine at Mount Sinai.
