

João Valente Cordeiro is an Invited Professor of Health Law, Biolaw and Bioethics at the National School of Public Health, NOVA University Lisbon and a health lawyer.

He has done biomedical research for over ten years during which he worked in five multidisciplinary research labs in three European countries. He worked with bacteria and virus models using animal systems and human cell lines and has published work in high impact top scientific journals. During his biomedical research career he became increasingly interested in the ethical, legal and social implications of science and technology, which led him to also pursue studies in Law and Ethics. For the last years he has focused on the interface between Health, Science, Technology, Law and Ethics and is actively involved in researching and teaching in the areas of Digital Health, Precision Medicine and Public Health, while also practicing law as a Health lawyer.
